#### **DETAILED ACTION**

#### Election/Restrictions

1. Applicant's election without traverse of Group I in the paper filed 1/16/04 is acknowledged.

### Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Hill (DE 4433474).

Hill discloses a process therein tea bags placed on an arm are lowered into a brew tank, subjected same to water (inherently circulated therein) wherein a tea concentrate is created, and raising said arm from the brew tank in such manner that same is squeezed against a spring loaded pad.

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/076,253

Art Unit: 1761

Claims 19-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hill (DE 4433474) taken together with Miller et al (U.S. Patent No. 5,899,137).

The claims further call for circulating the water to be used for the beverage through a heat exchanger and blend tank. However, such concept is well known as taught, for example, by Miller et al<sup>1</sup> (see Figure 1). It would have been obvious to one having ordinary skill in the art at the time of the invention to have employed water in such manner as a known alternative processing strategy in the art.

If it is shown that Hill does not inherently disclose circulation of water in the brew tank (as set forth in the rejection above), such is notoriously well known and Miller et al also teaches such a concept wherein water is circulated within a brewing chamber.

### Allowable Subject Matter

- 4. Claims 1-18 are allowed.
- 5. Claims 22-29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 6. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not disclose nor teach the particular process steps of preparing a brewed tea as specifically recited and including introduced water into a blend tank, circulated same through a heat exchanger and transferring to a brew tank,

<sup>&</sup>lt;sup>1</sup> Miller et al discloses that tea as well as coffee may be used in the system.

Application/Control Number: 10/076,253

Art Unit: 1761

circulating same in said brew tank with a tea, and circulating a created tea concentrate from said brew tank through said heat exchanger and said blend tank.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anthony Weier whose telephone number is 571-272-1409. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on 571-272-1398. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
